

VELOMAT operates in a context in which external factors (such as: customers, suppliers, market, attention to the ecosystem) and internal (such as: personnel, infrastructures, mandatory requirements) have effects on the efficacy of operational and management processes in terms of product quality, safety and healthiness of the staff work environment.

VELOMAT, due to the changed conditions in which the company operates for the context described above, considers it important to:

- Orient the marketing and design activities to plants for the production of high-volume closures and dispensing devices.
- Expand the customer base to ensure greater budget coverage.
- Maintain and improve current product quality standards.
- Promote working conditions that ensure the safety and health of personnel.

To implement the Policy, the Chief Executive Officer makes human and economic resources available, so that:

1. Workers are trained, informed and sensitized to carry out their tasks safely.
2. Workplaces, operating methods and organizational aspects are fulfilled in such a way as to safeguard the health of workers, company assets, third parties and the community in which the company operates.
3. Information on business risks is diffused to all workers; their training is carried out and updated with specific reference to the job performed.
4. The laws and regulations in force for the safety and health of workers are respected.
5. Activities are also managed with the aim of preventing accidents, injuries and occupational disease.
6. Compliance with the product requirements expressed by the Customer is ensured, including those relating to compliance with rules and regulations.
7. The technical standardization of machines and systems is pursued.
8. The organizational structure defines precise and circumscribed tasks and responsibilities.
9. The improvement of company processes is pursued and the objectives to be achieved are defined.

The Chief Executive Officer keeps this Policy updated and periodically checks, with the system reviews tool, the effective implementation of the policy, the achievement of the set objectives, and the promotion of continuous improvement.

Data 19/07/2019

Chief Executive Officer

Ing. R. Mancini
